

# B-SAFE LATERAL TRANSFER PROGRAM

We utilize our Safe Patient Handling expertise to guide you in creating an injury prevention solution that not only meets your goals and objectives, but also results in a program that is yours, at a price that works for you.

Conventional injury reduction programs are rarely sustainable and fail to recognize that what might work for one facility, may not work for another.

With an approach based on listening and collaboration, we will develop a successful and sustainable solution with you, tailored to specifically meet the needs of your healthcare facility.

Your program can include:

- Consultation and Evaluation
- On-Site Assessment
- Solution Roundtable
- Quarterly Improvement Visits
- Video and Webinar Support
- Culture ID
- Product Selection, Budget Review, & Conversion Planning
- Initial and On-Going Education Options

The B-Safe program is a value-added service for all of our Bridge customers!

- Expert and Clinical Safe Patient Handling Support
- Data Collection & Evaluation
- Documents & Forms
- Maximize Your Spend
- Maintain Safety
