

SAFE PATIENT HANDLING & PRESSURE INJURY PREVENTION

Bridge Healthcare by Pelstar provides clinically advanced Safe Patient Handling, pressure injury prevention, and infection prevention products that result in positive healthcare outcomes.

Why Choose *Bridge Healthcare* as Your Lateral Transfer and Repositioning Partner?

Pelstar LLC is a leading manufacturer in the healthcare industry, known for its commitment to quality, innovation, and customer-focused solutions. As an ISO 13485 and 9001 certified company, Pelstar ensures its products adhere to the highest standards of safety and reliability. The company operates two renowned brands: **Health o meter® Professional Scales** and **Bridge Healthcare**.

With over 25 years of experience, our team has been providing solutions to enhance care and safety across the healthcare industry. Our comprehensive portfolio of Air Transfer, Slide Tubes, and McAuley Rollboards, and Pressure Injury Prevention Products ensure staff safety in a variety of healthcare settings, while offering value-based options that exceed clinical and financial expectations.

Clinical Value

Our products are designed and tested to the highest clinical standards. Our product data supports successful outcomes related to force, pressure and microclimate. Advanced clinically-driven sourced product materials are used in all of our Bridge products, giving you a quality product that benefits staff, patients, and the organization.

B-Safe Solutions: Tailored for Your Needs

B-Safe Solutions offers a tailored approach to guide you in making the right decisions. Our solutions are fully supported by the clinical expertise required to help you achieve the outcomes you desire.

BRIDGEAIR TM

Single Patient Use Lateral Transfer Solution

BridgeAIR™, an innovative air-assisted breathable lateral transfer and repositioning mattress, is designed to prioritize the well-being of caregivers, patients, and healthcare organizations. With its exceptional features, this mattress revolutionizes patient transfer by significantly reducing the physical effort required, offers advanced microclimate testing for optimal comfort, and provides value-driven purchasing programs that set it apart as the premier choice.

Design

- Quality-focused design and construction
- Rigorous clinical testing conducted with a leading independent laboratory
- Clinicians can trust in the reliability and effectiveness of BridgeAIR™ for patient care

Safety

- Reduce lateral transfer force by 80%-90%*
- Minimize staff and patient injuries related to lateral transfers and repositioning
- Easy to use; drives compliance

Microclimate

- Advanced materials allow for optimal breathability
- High-wicking properties maximize water vapor transmission rates
- Safe to leave underneath patient when not in use

BRIDGE STAR

Safe Turning and Repositioning System

BridgeSTAR™ System, is a single patient use safe turning, transfer, and repositioning system used by caregivers to safely manage a variety of frequent and strenuous patient handling tasks. The Star system promotes positive outcomes related to injury prevention and hospital-acquired pressure ulcers ensuring a safe environment for staff and patients. Available in air and sheet systems, and can include foam wedges and breathable absorbent protection pads in various sizes. All products can be purchased individually, or ready-to-use kits for streamlined ordering and inventory management.

BridgeSTAR™: Complete Patient Care Solution for Safer Repositioning at Every Turn

- ✓ **Injury Prevention** – Prevents injuries by significantly reducing the effort and forces required to perform turning and repositioning tasks.
- ✓ **Wound Care** – Incorporates breathable materials allowing the system to be left underneath the patient for high staff compliance when following turning and repositioning protocols. Eliminates sheering and friction.
- ✓ **Sizing** – Available in multiple sizes to meet the needs of your patients and the environment to achieve the highest compliance.
- ✓ **Cost** – It's a small price to pay to prevent injuries and health-acquired pressure ulcers. When you compare it to other costly solutions, it makes sense for your budget.
- ✓ **Versatile** – Effective in general Medsurg, Emergency, ICU's, and many other departments and settings.

Get the kit that fits your needs—available with or without wedges!

BridgeAIR™+STAR Kits

- Each BridgeAir Star Kit includes our advanced Air Transfer & Turning Mattress, and high-performance BreatheDRY™ absorbent pad — designed to support safe patient handling, pressure injury prevention, and moisture management
- Combines essential products into a single kit to reduce setup time, simplify inventory, and help staff deliver more efficient, consistent care
- Designed for ICU, step-down, and immobile patient populations — improves outcomes by supporting mobility protocols, caregiver safety, and skin integrity initiatives

BridgeAIR™+STAR Mattresses

- 1200 lb weight capacity
- Significant reduction in the forces required to laterally transfer and reposition patients
- Easy to clean, breathable fabric supports a favorable environment for skin health
- Includes bed attachment straps for improved patient safety

BridgeSTAR™ Repositioning Sheets

- 800 lb weight capacity in standard sizes, 1000 lb weight capacity in x-large size
- Reduces force required to reposition patients
- Multiple handles to make turning simple

BreatheDRY™ Absorbent Pads

- Breathable absorbent layer that draws in moisture away from the skin
- Soft, non-woven air-permeable top layer for patient comfort
- Manages climate control and preserves skin integrity

BridgeSTAR™ Turning & Repositioning Wedges

- Supportive wedges to reduce the risk of pressure ulcers
- Non-slip base ensures secure placement with handles for easy removal
- Directional arrows showing proper placement and position
- Available in multiple sizes and tail option

SLIDE MATE®

Single Patient Use Slide Tubes

The SlideMate® is a single-patient-use slide tube that makes transferring and repositioning patients safer and easier across a variety of healthcare settings. Its durable design reduces the physical strain on caregivers, helping prevent injuries. Simple, effective, and cost-efficient, SlideMate® makes the repetitive and difficult tasks of transferring and repositioning your patients so much easier. You will always want a SlideMate® by your side!

SlideMate® Slide Tubes: Simple to Use and Budget Friendly

- ✓ **Safety** - Reduces patient transfer force by up to 50%, helping prevent injuries and reduce strain on healthcare employees.
- ✓ **Durability** - Strong enough to last the entire patient stay.
- ✓ **User-Friendly** - Easy to retrieve from wall dispensers or pocket-size version.
- ✓ **Versatile** - Effective in general Medsurgery, OR's, radiology, cath lab, emergency, ICU's, transport, and many other departments and settings.
- ✓ **Patient Dignity** - Soft, premium fabric provides a more comfortable transfer experience.
- ✓ **Budget Friendly** - A cost-effective way to protect staff.
- ✓ **Sizing** - Available in multiple sizes to meet the needs of your patient.

GOLDROLLBOARD

No Lift Lightweight Patient Transfer System

Gold Rollboard is a lightweight, non-metal patient transfer device designed to optimize caregiver safety, patient comfort, and infection control. Up to 75% lighter than traditional metal boards, it features a sleek, low-friction surface and soft foam core for smooth, gentle transfers—no hard rollers, no heavy lifting. Its heat-sealed seams, antimicrobial materials, and MRI-safe construction make it ideal for modern healthcare environments, supporting safe, efficient workflows without compromising hygiene or patient dignity.

McAuley Gold Rollboard: Lightweight, Hygienic, and Built for Comfort

- ✓ **Lightweight** – The Gold Rollboard is up to 75% lighter than metal boards, making transfers easier and reducing staff fatigue.
- ✓ **Infection Control** – Heat-sealed seams, antimicrobial materials help prevent contamination and keep surfaces hygienic.
- ✓ **Safety** – Our smooth, roller-free surface ensures gentle transfers without bruising or imaging interference.
- ✓ **Patient Comfort** – A soft foam core provides a comfortable, dignified transfer experience.
- ✓ **Friction Reduction** – Low-friction design and conveyor action enable effortless, injury-free patient transfers.
- ✓ **MRI Safe** – Non-metallic construction ensures full safety and compatibility in MRI and imaging environments.

PATIENT TRANSFER SCALE

Portable Patient Transfer Weighing Solution

Patient Transfer Scale is a transfer board with a built-in medical scale that provides a weight measurement when transferring a patient. Designed by clinicians for clinicians, it provides a fast, accurate solution for weighing critical or immobile patients—helping to reduce door-to-needle times in time-sensitive situations. While it benefits all departments, it's especially valuable in Stroke Units, the Emergency Room, ICU, and Radiology. The kilograms-only version is ideal for Stroke Units, where medication dosing depends on precise weight measurements in kilograms. It offers a reliable alternative to in-bed scales, which are often uncalibrated or inaccurate.

Patient Transfer Scale: Quickly and Accurately Weigh Mobile Patients

- ✓ **Easy to Use** – The PTS is light and portable with simple functions.
- ✓ **Accurate** – Delivers quick, reliable weight measurements unlike traditional hospital beds that often lack precision.
- ✓ **Efficient** – A safe solution for shortening door-to-needle time for time critical patients.
- ✓ **Seamless Integration** – Can be utilized as part of an existing patient transfer process.

BREATHEDRY™

BreatheDRY™ BridgeAIR™ Absorbent Protection Pads

BreatheDRY™ Breathable Absorbent Pads are a white, soft flat sheet with an absorbent layer and a waterproof breathable underside that stops fluid from getting through to equipment below and wicks away moisture to protect the patient's skin—designed to be breathable and to manage climate control and preserve skin integrity. The BreatheDRY™ Absorbent Protection Pads provide a breathable, latex free absorbent layer that can be placed on top of the BridgeAIR™ mattresses to stop fluids from getting through and protect a patient's skin while providing comfort.

3 Layers of Protection:

1. Soft, non-woven air-permeable top layer is gentle on the skin of the very young to the very old, as well as vulnerable and fragile skin during periods of illness.
2. The super absorbent inner layer allows body fluids to be taken away from the skin. The fluids are locked in the inner layer to keep skin dry.
3. The breathable, waterproof backing assists with the containment of fluid for safe disposal.

99.87%
MOISTURE
IS LOCKED
IN AFTER
5 MINUTES!

Moisture Management

Preserving the micro-climate, the BreatheDRY™ draws in moisture, locks it away from the skin and feels dry to the touch in just minutes.

High Level Fluid Handling Capacity

Absorbs 3.2 liters per m² (AWTA 62) which assists the containment and safe disposal through control of fluids.

Watch Video!

Breathable Backing

Permits air flow with air permeable backsheet. Compatible with all pressure redistribution surfaces, including low air loss mattress therapy. 20 times more breathable than traditional blue underpads.

Reduce Cleaning Costs

By protecting your bedding, air-assisted patient transfer mats, or tables, equipment, and patient slings.

The **One-Way Slide Cushion** was designed to safely position patients/ residents in chairs, wheelchairs, beds, or cars reducing the risks of slips and falls. The One-Way Slide Cushion uses a low-friction tubular design that only slides to the back of the chair, not forward. This prevents the patient/resident from egressing forward out of the chair. The cushion simplifies caregiver assistance, eliminating the need for lifting, while patients can easily adjust it independently.

PRODUCT SPECIFICATIONS

Product Size

18" x 16"

Material

Polyurethane coated polyester, Latex free

Weight Limit

550 lb/ 250 kg

Machine-Washable

Can easily be washed under water temperature 160° F/71° C. Do not tumble dry, do not iron, do not bleach

- Low friction cushion that holds patient/resident from sliding forward in their chair
- Easily adjust patient/resident back in their seat to maintain posture
- Patient/resident maintains a safe, secure posture
- Prevents fall-related injury
- Clearly labeled for proper orientation
- Soft, comfortable, breathable/ wicking material; tubular design
- Easy for patients/residents to do by themselves
- Easy for staff to help without having to lift
- Can be used in a car, chair, bed, or underneath any pressure relief cushion or incontinent pad

This device prevents the patient/ resident from sliding forward and falling.

Air-Assisted Patient Fall Recovery Device

FloJac is a high quality air lifting device that enables the fallen patient to be raised from the floor in a safe and controlled manner. It comes complete with a support wedge as standard which is ideal for patients who require to maintain a semi-recumbent position. Designed with infection control as a priority, the Flojac features an easy to clean safety strap, ladder handles, and has no removable parts.

FloJac: A Safe Alternative Method to Lift a Fallen Patient

- ✓ **Safe and Controlled Patient Lifting** – The Flojac has five individual chambers, including two pressure indicators to control inflation and deflation, making it easy for caregivers to transfer patients to surfaces of varying heights
- ✓ **Infection Control** – Easy to clean wipeable handles and safety strap, with no removable parts, promoting quick and simple cleaning.
- ✓ **Safety** – Minimize staff and patient injuries related to lifting a fallen patient from the floor.
- ✓ **Patient Comfort** – A soft, inflatable support wedge provides added patient comfort.

B-SAFE Solutions

Our Offerings: Categorized for Your Convenience

- **B-SAFE with ACE:** Stop overspending with solutions that optimize your budget
- **B-SAFE by Department:** Targeted solutions for delivering injury-free care across specific areas of your facility
- **B-SAFE Clinical Support:** Reliable clinical support, always there when you need it

B-SAFE with ACE

ACE (Alleviate Costly Expenses) Your Approach to Single Patient Use Products.

In today's healthcare landscape, reducing costs while maintaining quality is crucial. Bridge Healthcare's B-Safe ACE Solution offers high-quality, clinically effective products that replace costly single-use items.

B-SAFE by Department

Stay injury-free while doing your job.

Performing repetitive and strenuous tasks, such as Transferring, Boosting, Repositioning and Turning patients, increases your risk for injuries, burnout, and exhaustion. At Bridge Healthcare, we understand that each department faces its own unique challenges. That's why we've developed department-specific product solutions to reduce your risk of injury while making your job easier.

B-SAFE Clinical Support

The B-SAFE Clinical Support Program is a value-added service for all Bridge Healthcare customers

We utilize our clinical expertise to guide you in developing an injury prevention and pressure management solution that not only aligns with your goals and objectives, but also retains desired clinical outcomes.

Traditional injury prevention and wound care repositioning programs often lack sustainability and fail to recognize that each facility has unique needs.

Our approach is based on listening and collaboration, ensuring we develop a successful and sustainable solution tailored specifically to the needs of your healthcare facility.

B-SAFE Clinical Support Includes:

- In-Person and Virtual Support
- Initial and On-Going Education Options
- Quarterly Outcome Improvement Visits
- Consultation and Evaluation
- On-Site Needs Assessment
- Compliance Correction Guidance
- Competency Guides
- Culture Improvement Process
- Product Selection, Budget Review, & Conversion Planning

Bridge Healthcare by Pelstar Support

Bridge Healthcare by Pelstar has over 170 skilled professionals based in the United States and Canada who manufacture, sell, service, and support our products. Our global headquarters in McCook, IL is home to our highly trained Customer Service and Technical Support teams, along with our engineering, logistics, and management team. On-site sales and support are provided in partnership with MedTech/MedCare, an industry-recognized leader in medical sales throughout the US and Canada.

Our American-engineered products are designed and manufactured to meet the requirements of the International Organization for Standardization (ISO 9001:2015 & ISO 13485:2016).
