

FLOJAC

Air-Assisted Patient Fall Recovery Device

The **FloJac** is a high quality air lifting device that enables the fallen patient to be raised from the floor in a safe and controlled manner, requiring only one person to operate with no lifting required. It comes complete with a support wedge as standard which is ideal for patients who require to maintain a semi-recumbent position. Designed with infection control as a priority, the Flojac features an easy to clean safety strap, ladder handles, and has no removable parts. The required air supply pump is included with purchase of the FloJac device.

FloJac: A Safe Alternative Method to Lift a Fallen Patient

- ✓ **Safe and Controlled Patient Lifting** – The Flojac has five individual chambers, including two pressure indicators to control inflation and deflation, making it easy for caregivers to transfer patients to surfaces of varying heights.
- ✓ **Infection Control** – Easy to clean wipeable handles and safety strap, with no removable parts, promoting quick and simple cleaning.
- ✓ **Safety** – Minimize staff and patient injuries related to lifting a fallen patient from the floor.
- ✓ **Patient Comfort** – A soft, inflatable support wedge provides added patient comfort.
